# Treatment Package

## LASIK Laser-Assisted In Situ Keratomileusis

Involves creating a corneal flap, reshaping the underlying tissue with a laser, and then repositioning the flap. Known for quick recovery and minimal discomfort, it is effective for treating nearsightedness, farsightedness, and astigmatism.

## SMILE Small Incision Lenticule Extraction

A minimally invasive procedure where a laser is used to create a small, disc-shaped piece of tissue within the cornea, which is then removed through a small incision. SMILE is valued for its potential in reducing dry eye symptoms.

## ASA or TransPRK ASA (Advance surface ablation) or TransPRK (Transepithelial Photorefractive Keratectomy)

A surface-based procedure that involves removing the outer layer of the cornea (epithelium) before reshaping the underlying tissue with a laser. ASA/ TransPRK is suitable for those with thin corneas and may be associated with a longer initial recovery compared to LASIK.

**ICL Implantable Collamer Lens** may also be considered. Especially those who are deemed not suitable for LASIK procedure this will be discussed with your doctor.

**PRE LASIK ASSESSMENT FEE RM280++**

FREE BASIC EYE SCREENING is available for walk-in patients or by appointment

## 1 Pre-LASIK Assessment

Please stop wearing contact lens completely, before your pre-LASIK assessment:

- Soft Lens (1-2 weeks)
- Semi Hard/Rigid Gas Permeable Lens (3-4 weeks)

For your pre-LASIK assessment, your eyes may be dilated for a full examination and you will experience blurriness for a period of 3 to 4 hours. Therefore, please arrange for someone to drive you home after pre-LASIK assessment.

Please bring your eyeglasses on the day of consultation. Approximately 3 to 4 hours in clinic. Please take this into consideration when you make plan for the day.

## 2 Pre-op instructions

- Please lay off contact lens completely for 1 week before the surgery
- Both eyes are usually done on the same day
- No fasting required

## 3 Before surgery

- Do not wear contact lens
- Shower & wash your hair
- Strictly NO make-up (especially eye make-up, mascara, eyelash extension) & perfume
- Bring a jacket or a sweater to keep you warm, as the surgery room is cold
- Arrange your transportation after the surgery
- Follow-up consultation: 1 day, 1 week, 1 month - separate charges apply

## 4 During surgery

- Do not squeeze your eyes tightly or move your head
- Do not move your eyes suddenly
- Do not be afraid of the laser sound
- Some burnt odor during the LASIK procedure is expected and is not a cause for concern

## 5 After surgery

- Wash your hands before caring for the eye
- Instill eye drops as instructed - do not squeeze your eyes upon instillation
- Clean the eyes and face area gently
- DO NOT RUB THE EYE
- Wear a sun visor/sunglasses during outdoor activities
- Wear protective goggles when cooking
- Wash your hair without splashing water into your eyes for at least a week, if not possible, wash your hair in a hair saloon
- Watching TV and working with computer is allowed but please do not strain your eyes
- No eye make-up for one (1) month
- No swimming and water activities for a month
- Avoid smoky or dusty areas, e.g. discotheque, pub, gardening etc
- Please take all precautions to avoid pregnancy: 6 weeks BEFORE and AFTER the refractive surgery

If you experience increasing pain or blur vision more than a day of surgery, please contact us immediately
